

HORTICOPIA® PROFESSIONAL VERSION V SYSTEM REQUIREMENTS

System Requirements	Recommended
Processor	2 GHz or more
Main memory (RAM)	1 GByte or more
Hard disk space	2 GBytes of hard disk space, plus 2 Gbytes per Library
CD-ROM and DVD drive	Required only for installation
Mouse or other pointing device	Required
Video adapter	Display of 65536 colors or more
Monitor	1024 by 768 screen resolution or more
Windows compatible sound card/subsystem	Optional, required to hear botanical names and background music
Printer	Optional, although a printer driver must be installed even though no physical printer is required
Operating System	Windows® XP Pro, Vista Business, Windows 7, Server 2003 or later

Installation of the *Professional Version V* requires approximately 1.5 gigabytes of hard drive space, exclusive of any picture library images. The amount of space required varies depending on what system components such as Microsoft Dot Net Framework, Microsoft SQL Server, and supporting runtime libraries are already present on your system. If you have a network, storage requirements are minimal for a client installation after installation of the server version.

The following table provides the size (in megabytes) for each of the picture/portfolio libraries:

Professional Version V	4,500
Woody Plus Library	1,780
Herbaceous Plus Library	775
Aquatics and Marginal Plants Library	170
Interior Plants Library	137
Armitage Herbaceous Selection Port.	1,120
Portfolio of Herbaceous Plants, Vol.1	456
Portfolio of Woody Plants, Vol. 1	1,537
