

Jacaranda

Jacaranda mimosifolia

Bignoniaceae

Persistence Deciduous

Leaf Color Green

Fall Leaf Co No change in fall color

Height 35' to 50'

Light Full sun

Blooms Purple

Bloom time early spring to late summer

Native Habitat

Northwest Argentina.

Culture Information

Heaviest-flowering and fastest growth occur in full sun. Young trees required frequent pruning in the nursery and landscape to develop strong structure.

Small trees of Jacaranda can tolerate light shade and will grow quickly. They thrive in sandy, well-drained soils but should be watered during dry periods until well established.
