Select the authored plant, Right click on the Attributes but	tton 🧰, click on
Edit Plant Attributes.	Show <u>Attributes</u>
	Edit Plant <u>A</u> ttributes
Begin clicking/unclicking those attributes you wish to char	nge Save Attributes V
	<u>C</u> ancel Attribute Changes
Clicking on a graphic/text outlined in green will de	eselect/
unselect the attribute from the search criteria.	Exposure Exposure
	Unselected
Clicking on a graphic/text that becomes outlined in green	
adds selection to the search criteria. Exposure	Exposure
	Selected
When you are finished changing the attributes, click on th	ne Attribute button

If you want your changed attributes to be reflected in the text of the Plant Information window, open the Plant Information window of your authored plant.

You can either generate data from a specific attribute area (Basic, Environment, Bloom and flower, Leaf, Crown, branches, and twigs, Leaf identification, Native Habitiat, Fruit),

or generate data for the plant from all of the attributes.
